**Subject:** Detecting illegal immigrant voters

Dear Rep Warren.

We plan to post the attached news release today on our website and will be happy to update it with your reply.

-

As Rep Jones pointed out in the committee hearing (beginning at the 26:30 mark in the video linked below), the bill prevents DMV from sharing their affected drivers' identifying information, "for any purpose other than the issuance of the restricted driver's permit."

-

This provision appears to prohibit DMV from sharing such information with the State Board of Elections. As you know, we have reason to believe thousands of non-US citizens are already registered to vote and some have already been voting. We appreciate that your bill does prevent the FUTURE use of the ID cards for registration, we believe it hinders the BOE from determining any PAST illegal voting. Please tell us how you will remedy this serious deficiency.

Jay DeLancy is Executive Director of VIP-NC, a trans-partisan, volunteer organization with a mission to restore trust in the democratic process through vote fraud detection, analysis and prevention. The group mines and analyzes public data for irregularities in the voting records that suggest vote fraud or administrative vulnerabilities. Their research has resulted in identifying three NC counties with more than 100% of its voting-age population registered to vote (the national average is 67%), discovering almost 30,000 deceased persons on NC's voter rolls; and finding more than a hundred people who voted in the 2008 election BEFORE they convinced the Wake County Clerk of Courts that they were not US citizens. To date, VIP's research has led to 17 criminal referrals (in two states). Six were against people for voting twice in the 2012 November elections and 11 criminal referrals went to ICE for non-citizens voting. As of April 20, 2015, their work has resulted in one arrest for felony vote fraud, but other prosecutions are still pending.
